

## BioTE© Bio-Identical Hormone Therapy

### What are "BioTe Bio-Identical Hormone Pellets"?

BioTE hormone pellets are slow release natural bio-identical hormones that are safe and effective for symptom management of low hormones. BioTe HRT pellets are derived naturally from plants and contain no synthetic or fake hormones like the majority of hormone replacements on the market. They are conveniently placed in the subcutaneous tissue under the skin as a "set and forget" method and requires NO creams or weekly painful injections to maintain a steady natural level of hormone without the roller coaster effects of other methods.

### Who should get pellets?

Adults with low serum blood hormone levels and experiencing any of the following symptoms:

- ✓ Fatigue
- ✓ Weight Gain
- ✓ Brain Fog
- ✓ Difficulty Building or Lack of Muscle Mass
- ✓ Poor Libido
- ✓ Difficulty Remembering Words
- ✓ No Motivation
